

PASMA - Combined Low Level Access and Towers for Users Course

Part One - Low Level Access

Part one of the combined course is aimed at personnel who work from prefabricated units of less than 2.5 metres of height.

The course involves both a theory and practical session and includes how to assemble, dismantle and relocate mobile access units without risk of personal injury to the delegate or others.

Part Two - Towers for Users

The second part of this course is aimed at personnel who will be responsible for assembling, dismantling, moving, inspecting and using mobile access towers. Instruction is in both theory and practical sessions. The course also covers current legislation and guidance affecting working at height with mobile access towers.

Delegates attending this course receive a course content booklet and PASMA Code of Practice together with a PASMA certificate and photocard for the relevant level that is valid for 5 years.
